

# En-ROADS Climate Solutions Simulator Workshop

**Rebecca Niles, System Dynamics Society**

**Wednesday, September 9<sup>th</sup> @ 3:30 pm**

En-ROADS is a policy simulation model that allows users to explore the likely consequences of energy, economic growth, land use, and other policies and uncertainties, with the goal of improving their understanding. The simulation, developed by Climate Interactive, Ventana Systems, and MIT Sloan, has been carefully grounded in the best available science and has been calibrated against a wide range of existing integrated assessment, climate and energy models.

This workshop will be facilitated by Rebecca Niles who is a trained En-ROADS Climate Ambassador and Executive Director of the System Dynamics Society.

Join us for this workshop to learn more about En-ROADS, how to incorporate it into your classroom, and how to become a trained En-ROADS climate ambassador.
